

ALTICE USA ANNOUNCES TECHNOLOGY EXECUTIVE APPOINTMENTS

***Promotes Terry Cordova to
Vice Chairman, Business Development – Network & Technology Services***

Names Philippe Le May to Chief Technology Officer

New York – August 30, 2017 – Altice USA (NYSE: ATUS), one of the largest broadband communications and video service operators in the United States and the provider of Optimum and Suddenlink-branded internet, TV and phone services, today announces leadership appointments effective immediately: Terry Cordova has been promoted to Vice Chairman, Business Development – Network & Technology Services, and Philippe Le May has been named Chief Technology Officer.

In his new role, Mr. Cordova will help to deliver on the Company's U.S. network and technology growth strategy efforts and represent the collective technical capabilities, interests and offerings of Altice in the U.S. to current and potential partners within the telecommunications and media space. He will report to Altice USA Chairman and CEO, Dexter Goei, and partner with the Company's Co-President and Chief Operating Officer, Hakim Boubazine. Mr. Cordova previously held the position of Executive Vice President and Chief Technology Officer at Altice USA, and prior to Altice's acquisition of Suddenlink Communications he served as Suddenlink's CTO.

Dexter Goei, Chairman and CEO, Altice USA said, "Terry is a respected leader in our industry and within Altice USA, and has made substantial contributions to the Company, spearheading the advancement of our fiber-to-the-home network, upgrading our networks and formulating strategic external partnerships for the Company. He is the ideal person to take on this strategic role as we position Altice for continued success and further growth in the U.S."

Mr. Le May will assume the role of Chief Technology Officer, and will focus on accelerating the development and delivery of key initiatives such as the build out and expansion of our fiber network infrastructure, developments and evolutions to our new home communications hub, wireless technology initiatives and next generation products and services. Mr. Le May has more than 25 years of experience in the telecommunications industry and joined Altice France in 2006, serving since 2008 as its CTO. He has successfully led the Company's full-scale fiber build, implementation of its home communications hub, and massive deployment of 4G/4G+ technology in France. He will report to Hakim Boubazine, Co-President and Chief Operating Officer at Altice USA.

Hakim Boubazine, Co-President and Chief Operating Officer added, "Philippe's vast experience in fixed and mobile technologies, executing a full-scale fiber build, integrating systems, and developing solutions that strengthen networks will provide significant benefits to Altice USA customers as we enhance the overall customer experience. His notable background and proven success in quickly and effectively implementing technology and operational strategy make him a terrific addition to our team."

Earlier this month, Altice USA announced updates to its FTTH network – design and construction has commenced for several hundred thousand homes concurrently in areas of New York, New Jersey and Connecticut, and the Company is on track to reach one million homes constructed by year end 2018. Altice USA's FTTH network will provide a superior customer experience, enabling a more connected home, business and society and delivering faster speeds to meet consumers' demands into the future. Altice USA is the only major U.S. cable provider to have announced plans for a large-scale FTTH deployment.

Following Altice USA's acquisition of Suddenlink and Cablevision, the Company has rolled out enhanced data and video services to its customers via its current network. The company more than tripled its internet speeds in its Optimum footprint, now offering broadband speeds of up to 400 Mbps for residential customers and 450 Mbps for business customers. Altice USA has also expanded 1 gigabit broadband service to more than 60 percent of its Suddenlink footprint, including recently launching gigabit service in seven cities across states including Missouri, Arkansas, and Oklahoma.
